Lemon

Lemons belong to the Citrus genre – subgenre of the Eucitrus (to which citrons, limes, oranges, mandarins and grapefruits belong, too) – limon species. It is the most re-flourishing citrus tree and its fruits present different features that determine a 12-month fruiting and product availability – depending on variety and cultivation area.

Type	Primofiore, bianchetto, verdello
Origin	Italy - Sicily
Variety	Femminello, Monachello, Interdonato, Lunario
Caliber	Depending on the diameter mm: caliber 1 from 72 to 83mm; caliber 2 from 68 to 78mm; caliber 3 from 63 to 72mm; caliber 4 from 58 to 67mm; caliber 5 from 53 to 62mm; caliber 6 from 48 to 57mm; caliber 7 from 45 to 52mm.
Characteristics	The main blooming takes place during April and May: these fruits are called “primofiore” (meaning “first flower”) and have an excellent juice yield and high acidity; the flowering that takes place between end of May and June produces the so-called “bianchetti”, while the flowering in July-August generates the “verdelli”, which have a juice yield between 20-25%.
Conservation	Temperature +10/13°C, with RH (%) 85-90; in this way it is possible to conserve the product for more than 30 days.
Available packagings	- net/girsac: 500g, 750g, 1kg - loose product in carton boxes: 6kg, 10kg, ... - other packagings available on request.
